

TRACKSO INSTALLATION GUIDE FOR ABB PRO-33.0-TL

Brand: ABB
Type: Solar On Grid String Inverter
Models: PRO-33.0-TL

CONNECTION DIAGRAM

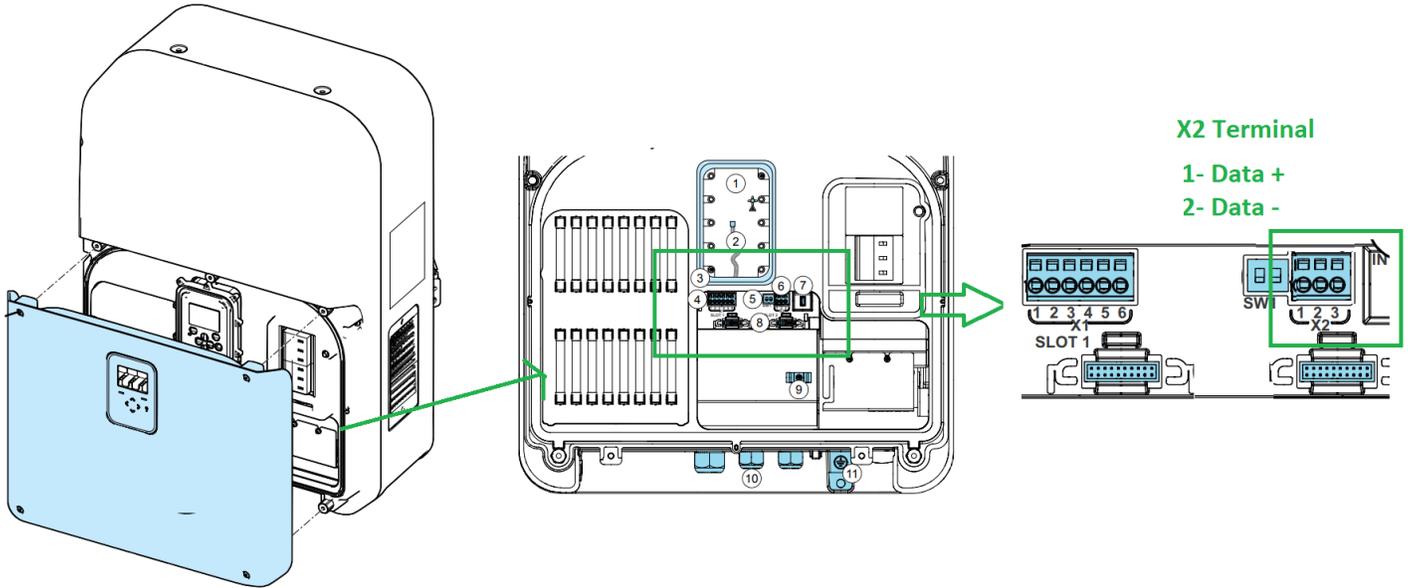

Figure A1 – ABB 33kW inverter Communication Port

The communication terminals (RS485) are located at the bottom of the inverter at X2 Terminal as shown in Figure A1

Steps:

- 1) Loosen the 4 captive screws and locate communication module as shown in Figure A1.
- 2) Install the wires in the appropriate terminals. Data+ to Pin 1 and Data- to pin 2 of X2 Terminal as shown in Figure A2
- 3) Tighten the gland. Make sure that the gland seals around the cable and that the cable does not move when pulled.

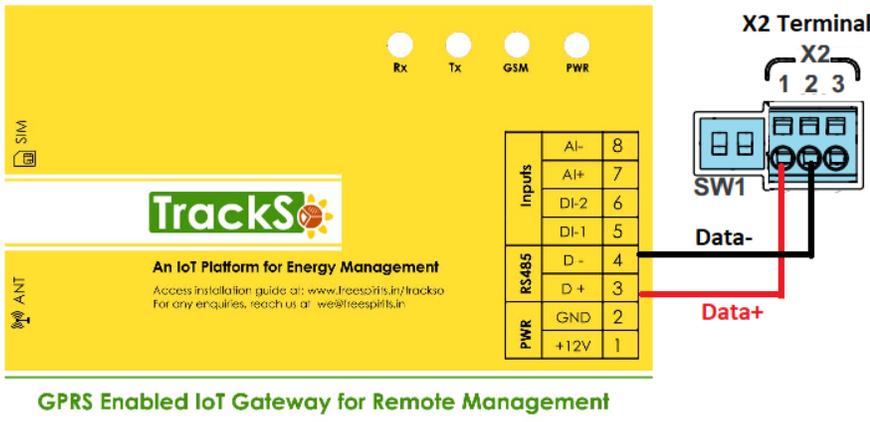

ABB Pin No. & Assignment		TrackSo Pin No.	
1	Data +	3	Data +
2	Data -	4	Data -
3	Isolated Gnd	-	-

Table AT1 – ABB connections with TrackSo

DEFAULT CONFIGURATION IN TRACKSO IOT GATEWAY

Interface: RS-485 (half duplex)

ID: 1 to 247

Baud Rate: 2400, 4800, **9600 (default value)**, 19200 38400, 57600 or 115200bps

Stop bit: 1

Parity: **No parity** (default value), even parity or odd parity

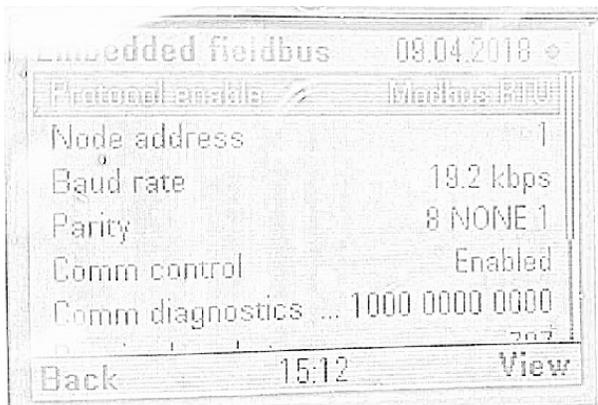

Data bits: 8

CONFIGURATION AT THE INVERTER END

SETTING THE PROTOCOL , INVERTER ID & BAUD RATE

Please Note

- 1) If you connect multiple inverters via RS485, set the same baud rate on each inverter.
- 2) The inverter ID is used to identify the inverter in a RS485 connection
 - a. Set a different inverter ID for each inverter in the PV plant. Otherwise, the inverters cannot be correctly identified.
 - b. On the last inverter in the RS485 connection, switch on the RS485 termination resistor.

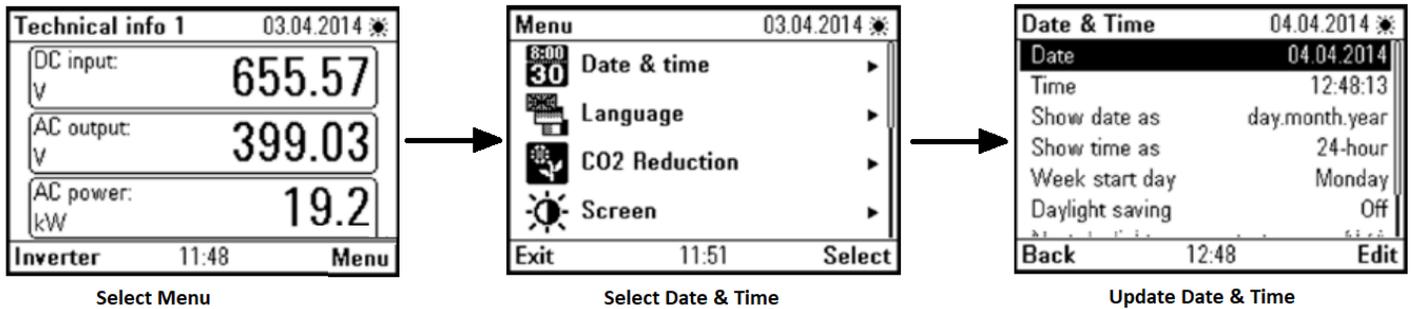

- ← Select Protocol to Modbus RTU
- ← Node address- 1,2, 3... (In continuation)
- ← Select Baud rate to 9600 bps / 9.6kbps

SET DATE & TIME OF INVERTER

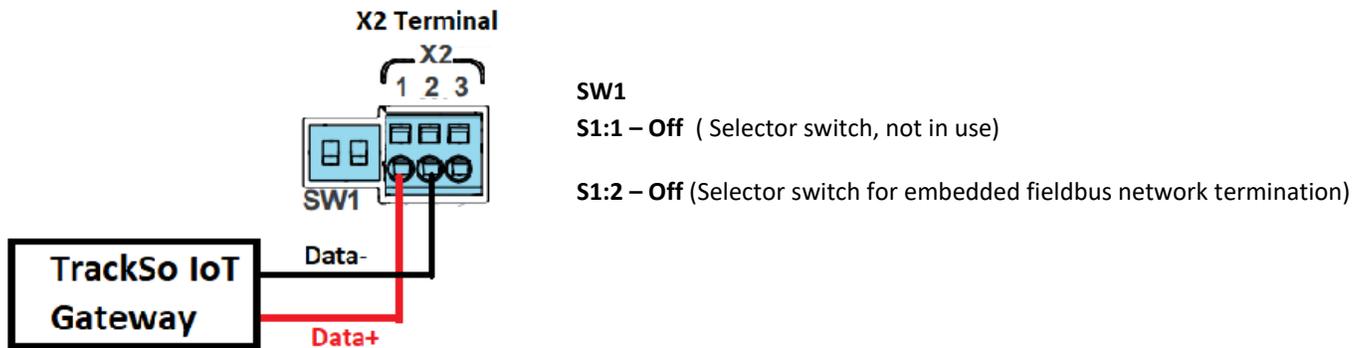

For a precise calculation of the statistics in the inverter itself and in a monitoring system, date and time have to be correct.

← Set the Correct Date & Time

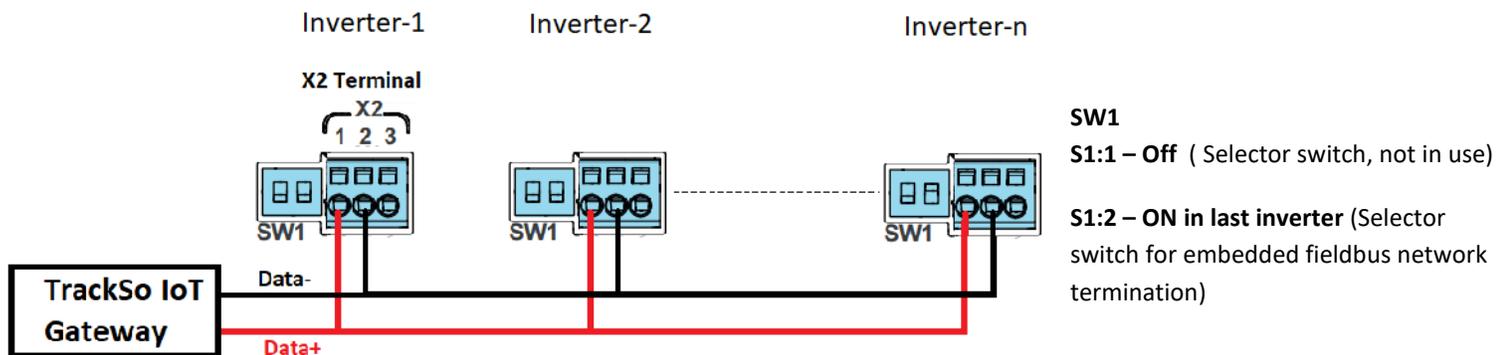

Communication Card Settings

Single Inverter

Multiple Inverters

The above details are mentioned in the [Installation & Operation Manual](#) for ABB PRO-33.0-TL

TRACKSO WORKING

1. Insure correct connections as detailed in the installation guide.
2. Insert the SIM card.

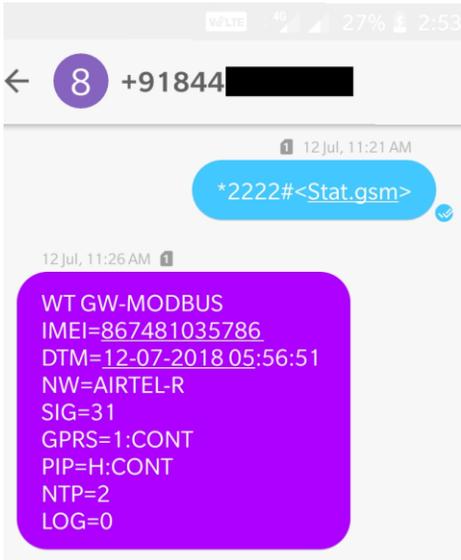

3. Switch on the power to the TrackSo device. (Minimum 12V/1A input is required)
4. Power LED (Red) of TrackSo IoT gateway glows and stays ON.

NOTE: TrackSo IoT Gateway will only be able to send data if the GPRS network is available at the installed location.

LED	NAME	DESCRIPTION														
GREEN	POWER	Light when Power on the device														
RED	GSM	<table border="1"> <thead> <tr> <th>LED Status</th> <th>Connection State</th> </tr> </thead> <tbody> <tr> <td>Flashing (ON for 100ms and OFF for 100ms)</td> <td>SIM Card not found</td> </tr> <tr> <td>Flashing (ON for 500ms and OFF for 500ms)</td> <td>Searching for GSM Network</td> </tr> <tr> <td>Flashing (ON for 0.1s and OFF for 2.9s) Once at every 3sec</td> <td>GSM Network Registered</td> </tr> <tr> <td>Flashing twice at every 3sec</td> <td>GPRS IP Connected</td> </tr> <tr> <td>Flashing 5times</td> <td>GPRS IP Sending data</td> </tr> <tr> <td>LED OFF</td> <td>GSM Fault</td> </tr> </tbody> </table>	LED Status	Connection State	Flashing (ON for 100ms and OFF for 100ms)	SIM Card not found	Flashing (ON for 500ms and OFF for 500ms)	Searching for GSM Network	Flashing (ON for 0.1s and OFF for 2.9s) Once at every 3sec	GSM Network Registered	Flashing twice at every 3sec	GPRS IP Connected	Flashing 5times	GPRS IP Sending data	LED OFF	GSM Fault
		LED Status	Connection State													
		Flashing (ON for 100ms and OFF for 100ms)	SIM Card not found													
		Flashing (ON for 500ms and OFF for 500ms)	Searching for GSM Network													
		Flashing (ON for 0.1s and OFF for 2.9s) Once at every 3sec	GSM Network Registered													
		Flashing twice at every 3sec	GPRS IP Connected													
		Flashing 5times	GPRS IP Sending data													
LED OFF	GSM Fault															
GREEN	COM TX	Blink on data transmission in RS485 port														
YELLOW	COM RX	Blink on data reception in RS485 port														

5. To check the exact network status send the following message to mobile number of the device

SMS Command= *2222#<Stat.gsm>	
IMEI	IMEI No. of the data logger (Device Key)
NW	Network
SIGN	Signal Strength out of 31
GPRS	CONT- connected , NC- not connected
PIP	Connected to TrackSo Server or not CONT- connected, NC- not connected
LOG	no. of data points stored in devices incase of no interet

6. If the GSM light starts flashing 5 times then Login to www.trackso.in with your Username/Password.
7. Click on 'Units' from the menu bar. You will be able to view your installed unit in the table as shown below.
8. Check if the **Status** becomes **Receiving** for the relevant Unit.

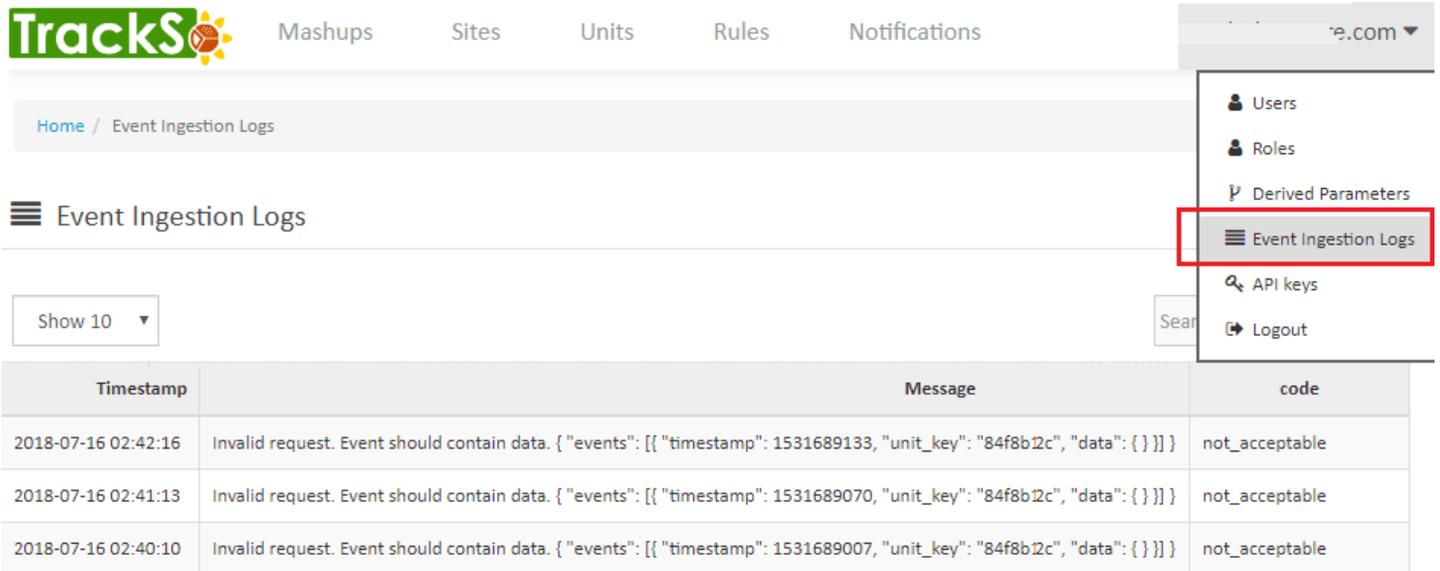

Mashups
Sites
Units
Rules
Notifications

Home / Units Add Unit

Unit Name	Site	Unit Key	Category	Data Status	Last Event Timestamp	Device Key	Device Phone	Actions
1-Schnieder		cc	Inverter	Receiving	2018-07-16 02:24:04	31034235444/1	9	View Data
2-Schneider		7799	Inverter	Receiving	2018-07-16 02:24:05	034235444/2		View Data
	School	5	Inverter	Not Receiving				View Data
	chool	5	Inverter	Not Receiving				View Data

9. If the state remains **Not receiveing** for more than 10 minutes, click on your email ID at the top right of the screen and click on 'Event Ingestion Logs' in the dropdown.

The screenshot shows the TrackSo web application interface. At the top, there is a navigation bar with the TrackSo logo and menu items: Mashups, Sites, Units, Rules, and Notifications. A user profile dropdown menu is open on the right, showing options: Users, Roles, Derived Parameters, **Event Ingestion Logs** (highlighted with a red box), API keys, and Logout. Below the navigation bar, the breadcrumb path is 'Home / Event Ingestion Logs'. The main heading is 'Event Ingestion Logs'. There is a 'Show 10' dropdown and a search box. Below this is a table with three columns: Timestamp, Message, and code. The table contains three rows of log entries, all with a 'not_acceptable' code.

Timestamp	Message	code
2018-07-16 02:42:16	Invalid request. Event should contain data. { "events": [{ "timestamp": 1531689133, "unit_key": "84f8b2c", "data": { } }] }	not_acceptable
2018-07-16 02:41:13	Invalid request. Event should contain data. { "events": [{ "timestamp": 1531689070, "unit_key": "84f8b2c", "data": { } }] }	not_acceptable
2018-07-16 02:40:10	Invalid request. Event should contain data. { "events": [{ "timestamp": 1531689007, "unit_key": "84f8b2c", "data": { } }] }	not_acceptable

10. Check if there is some log generated at the time of installation of the TrackSo IoT Gateway device.
- If **NO**, please restart the device and try the same flow again.
 - If **YES**, email us at we@freespirits.in to consult the same.
